# Avata

Avata is a technical gateway enabling plug-and-play solutions designed to cover risk for both on-chain and off-chain digital assets in various environment from Web2 (gaming assets and digital keys), Web2.5 (tokenized real-world assets) and Web3 (NFT) use cases. All accessible through a simple API integration.
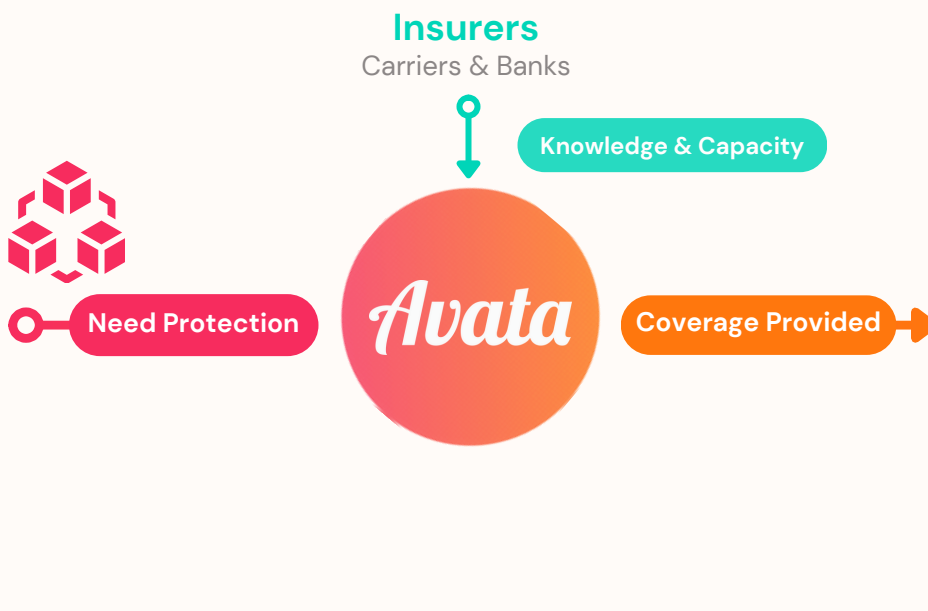

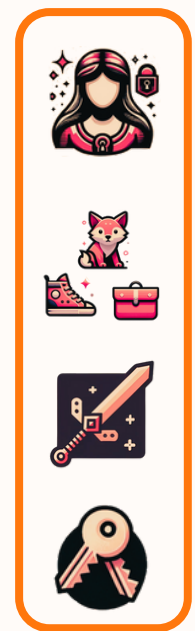

Connecting Insurance with Web3 Digital Assets

Through its platform, Avata enables the distribution of customized insurance solutions and warranty products for Web3 digital asset owners, in a fast, secure, and cost-effective way. To enable a one-stop integration to worldwide coverage protecting from theft, hacks, exploits and more, we partner with a broad range of insurance companies.

Insurance's Role in Digital Asset Protection

Whether it is a account, in-game item, or even intellectual property, embedding coverage for digital assets can help protect against theft, hacks, exploits, loss, and more; adding tremendous value, including:

- **Comprehensive risk management** – financially protected assets & projects
- **Ancillary revenues for platforms** – revenue share per transaction
- **Customer lifetime Value** – in-store credit payout options for customer retention
- **Enhanced customer experience** – with seamless policy issuing and claim filing

Avata supports brands delivering peace of mind to their customers by directly integrating into your platform's checkout flow. As customers check-out, Avata can offer coverage for the digital asset(s), and with 2 clicks, the digital asset will be covered post purchase.

Digital Asset Warranty

The protection covers the transfer of valuable assets to mitigate the risk of the asset being intercepted during the process by contact malfunctions or hack.

Coverage Amount	Duration	Price
0.18015 ETH	**180 Days**	**0.0108 ETH (6%)**
$648.02		$38.88 (6%)

By including NFT warranty you agree to the **Terms and Conditions** and **Privacy Policy**
